

378. Geology. General. **Systematic Geology & Descriptive Geology, 1877 & 1878.** Volumes 1 and 2. Vol. 1 has 26 fabulous **color plates** of western sites, while the text is general geology of the west. Vol. 2 has 25 fabulous color plates of the west with text as follows: Nevada about 400 pp; Utah about 150 pp; Wyoming area about 310 ppg. **Systematic Geology** by **Clarence King, U. S. Geologist, 1878**, 803 pages, indexed. This volume represents King's culmination to his Survey of the Fortieth Parallel. The second volume was actually published a year earlier than King's volume. **Descriptive Geology** by **Arnold Hague & S. F. Emmons, 1877**, 889 pages, indexed. The volumes are full of landscape sketches drawn along the Survey as well as the maps that were made of the topography and geology. These volumes are classic works that mark the breakthrough of physical sciences in America. Clarence King was the leader of one of the Great Surveys that not only catalogued the West but launched American scientists in the international limelight. Wear to bindings and edges. Very fine. Est. \$400-800

379. Geology. General. **USGS 18th Annual Reports I and II.** Lot of 2. The first is the Director's report, describing USGS work throughout the US, generally focusing about one page per area. 440 pages, hard bound, with gilt image on the cover. The second, Volume II, consists of papers chiefly of a theoretical nature. 653 pages, nicely illustrated with photos, etchings and maps. Both have Central College adhesive stamps on inner cover, the second with an additional seal stamp for the same library. Both are in fine condition, with normal wear to hard covers, and slightly loose binding. Est. \$100-200

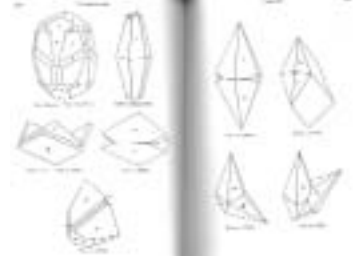

380. Geology. General. **USGS 20th Annual Report, Part III, 1900.** Focuses on the precious-metal production in districts lying in Oregon, Idaho and Montana. Nicely illustrated by plates, color maps, and photos. 595 pages. Both are hard bound, both with an adhesive and seal Central Library stamp at inner cover and first page. Spine is a bit loose, cover is worn, making it difficult to interpret print on spine. Est. \$100-300

381. Geology. Hydrology. **20th Annual Report of the USGS, Part IV, 1900.** Focuses on the calendar year 1898 stream measurements. Several Photos included in 660 pages. Hard bound, with wear to binding. Stamp and seal for Central College Library. Est. \$50-100

382. Geology. Mineralogy. **Dana's System of Mineralogy. Vol. I and II**, of James Dwight Dana & Edward Salisbury Dana of Yale, Univ., 1837-1892. Seventh Edition, entirely rewritten by Charles Palache, et al, 1958. Approximately 834 pages each. Blue hard covers in extremely fine condition. Est. \$50-75

383. Geology. Mineralogy. **Mineralogical Publications.** Lot of 10 different pcs. **Field Test for Minerals**, Davison, E. H., 1940. Published by Chapman & Hall, 60pp, indexed, softbound. 12 plates of hand specimens, a chart on mineral identification and text on blowpipe analysis. **Getting Acquainted with Minerals**, by English, George, 1934, 324pp, indexed. **Minerals of California, Bulletin 173, 1956**, 452pp, no index, bibliography. Seven (7) issues of **Mineral Information Service**, c.1958. All in very fine condition. Est. \$50-150

384. Geology. Mineralogy. **Mineralogy Related Publications.** Lot of 3 pcs. **Dana's Textbook of Mineralogy**, by Edward Salisbury Dana, 1932, revised by W.E. Ford, 851 pages; **A Handbook of Rocks**, by James Furman Kemp, E.M., D.Sc., 1918, 272 pages, inscribed by two owners, one in pen, the other stamped; **Minerals Yearbook, 1938, Review of 1937**, compiled by H. Herbert Hughes, 1938, 1339 pages, Indexed. All Vf, with wear to hard covers. Est. \$50 75

385. Geology. Minerals. **Minerals of California, Bulletin 136, 1948.** CA Division of mines professional paper, by Joseph Murdoch and Robert W. Webb. 402 pages, hard bound. Vf-Xf. Est. \$25-50 (no illustration)

386. Geology. Paleontology. **20th Annual Report of the USGS, Part II, 1900.** 953 pages, with extensive plate collection. Hard bound. Damaged cover at binding, also very worn making it difficult to interpret spine. Est. \$200-400

387. Geology. Paleontology. **Fossil Book: the Exciting Story of Plants...During the Past Two Billion Years**, by Carroll Land Fenton. Published by Doubleday and Co., 1958. Tells "the story of life during the past two billion years... what fossils are, where they are found... and how they are related to plants... and other living creatures living on the earth today." 482 pages, hard bound, with colorful display of fossils on dust jacket. Many images throughout. Xf, dust jacket is a bit damaged by folds and tears. Est. \$25-50
