Mine properties were located 30 miles south of Bullfrog in the Funeral Mountains. The Lee Mining district was discovered by 2 brothers, Gus and Richard Lee, in November 1904. The Lees staked two claims, the Hayseed and the State Line. In May, they optioned the Hayseed to Goldfield speculator W. F. Patrick for \$75,000 with 10% down. Patrick died suddenly two months later and the boys found they got to keep both the Hayseed and the \$7500 down payment. This certainly beat selling the mine, so they eagerly optioned it again and again and yet again, collecting another \$7500 to \$10,000 each time. The only problem was, they didn't bother to wait for one option to expire before letting the next one. Litigation over the Hayseed was finally settled in February, 1907, and the Hayseed Mining Co was formed by Rhyolite, Nevada, promoters. Assays reportedly ran up to \$123,000 per ton which further fueled the excitement about the property (Lingenfelter, 1986, Death Valley & the Amargosa, pp278-79).
