**1002.** Storey. Virginia City. **A. M. Cole Aqua Patent Medicine Bottle.** 6.5" tall, 2 7/8" across face, 1 3/4" wide. Light interior stain. This is one of the top colored Nevada drugstore bottles. It has only a very minor old chip 1/16" on the front lip. Cole was the most prolific of the Virginia City druggists and the longest lasting. He was there as early as 1863. I think this bottle dates to the 1870-1875 period. At one time I found an advertisement for a patent medicine handled by Cole that fit perfectly into the sunken panel on the back side, but did not retain it at the time because I never expected to rewrite the bottle book. I've searched every directory and many newspapers trying to find it again to no avail. There are about 12 to 15 of these pretty aqua medicines in western collections, not nearly enough to go around. Provenance: H. Dunn collection, one of the original Bottle Book census bottles. Est. \$1000-2000
